--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-5, drawn to a method for producing a thermoplastic/rubber composition, classified in Class 525, subclass 88.

II. Claims 6-9, drawn to an extruding "equipment" , classified in Class 425, subclass 294.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process which is a process of producing a composition containing two rubbers or two thermoplastics.

This application contains claims directed to the following patentably distinct species of the claimed invention: Applicants are required to elect a single thermoplastic from (1) an ethylene containing polymer, (2) a propylene containing polymer, (3) a polyolefin not including ethylene or propylene containing polymers, (4) polystyrene, (5) ethylene vinyl acetate copolymer, (6) polyvinyl chloride and polyvinylidene chloride, (7) acrylic resins, (8) polyvinyl alcohol, (9) ABS resins, (10) AS resins and

polycarbonate, (11) polyester, (12) polyacetal, (13) polyamide, (14) polyphenylene ether, (15) polysulfonates, (17) polyphenylene sulfides, (18) polyether ketones, (19) PTFE. Applicants are also required to elect a single rubber from one of the rubbers mentioned at page 12 line 7 - page 13 line 3 of the instant specification.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-9 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit 1711

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Due to the complexity of this election/restriction requirement, no election/restriction was attempted by telephone.
